Jakarta Architecture Festival Exhibition

SEP 18, 2023

Anggara Architeam was also selected as one of the curated exhibitors for the Jakarta Architecture Festival. For the exhibition, Anggara Architeam showed one of our notable projects, the redesign of Epiwalk Mall.

The redesign of Epiwalk aimed to improve visibility and create a welcoming facade, fostering vibrant activities within the space. Rooted in the themes of transition and transformation through biophilic elements, the design blends nature and architecture harmoniously. Inspired by the "tampah," the canopy symbolizes gathering and serves as a dynamic public space, bridging indoors and outdoors. Greenery intertwined both horizontally and vertically, connecting levels and inviting contact with the adjacent river. This architectural endeavor fostered a gentle transition from urban to public space, nurturing a community spirit, enhancing thermal comfort, and forging a strong bond between people and nature, resulting in a dynamic sensory experience celebrating the beauty of the natural world.

© 2023 Anggara Architeam

Privacy Policy

EPIWALK

JAKARTA, INDONESIA

The redesign of Epiwalk presents a deliberate effort to enhance its visibility and welcoming facade, addressing the need for more vibrant activities within its premises. The overarching design concept centers around the themes of transition and transformation, achieved through biophilic regeneration. This approach not only revitalizes the space aesthetically but also promotes a harmonious coexistence between nature and architecture.

The canopy design draws inspiration from the "tampah," symbolizing the act of collecting. In this context, the canopy serves as a representation of a public space with distinct social characteristics relevant to its time. This innovative design not only fosters engagement but also bridges the gap between indoor and outdoor spaces. Horizontal and vertical greenery intertwine effortlessly, forming a unified relationship throughout the levels and allowing nature to become a key component of the environment. Furthermore, the design emphasizes direct contact with the adjacent river, encouraging public interaction and appreciation of the waterfront.

Genah Organics

Client:
PT Sumberagro Anugerah Makmur

Type:
Company Profile

Description:
Designed and developed a company profile website for an organic farm that combine the craftsmanship of farming heritage with a modern, integrated organic system

The website have a strong storytelling approach to explain the farm's vision to be a sustainable, integrated organic ecosystem farm.

- Features & Technologies:**
- UI/UX development with a focus on visual storytelling
 - Custom themes using Word-Press and Elementor.
 - SEO optimization for enhanced visibility

 **Website Link**

BUILDING INDONESIA'S NEXT GENERATION ORGANIC ECOSYSTEM.

We cultivate high-quality organic produce through an integrated soil-to-harvest system that empowers farmers, protects the land, and delivers consistent value to our partners.

OUR VISION

We believe the future of organic agriculture isn't just about producing healthier food, but it's about building a resilient ecosystem where land, technology, and local wisdom work together to deliver consistent value.

GENAH was founded to bridge the gap between modern farming standards and the reality faced by many local farmers. Instead of relying on fragmented processes, we are building an integrated, soil-to-harvest ecosystem that ensures full control, transparent quality, and reliable supply for our partners.

Behind every system are the people who make it possible. We work closely with Cianjur's local farmers by transferring knowledge, refining techniques, and combining traditional insight with sustainable organic practices.

The result is not only healthier, chemical-free produce, but also a farming community that grows stronger, and mature.

With this ecosystem, GENAH aims to deliver premium organic products that reflect both efficiency and authenticity.

A modern agricultural model rooted in community, sustainability, and long-term reliability.

WHY GENAH

We combine the craftsmanship of farming heritage with a modern, integrated organic system to ensure every product is both naturally superior and reliably produced.

1 QUALITY NURTURED FROM SOIL TO HARVEST

Each crop is cared for from the moment it touches the soil, using organic compost, clean cultivation practices, and meticulous handling. The outcome is produce with richer flavor, better texture, and a naturally premium standard can rely on.

2 EMPOWERED FARMERS, BETTER QUALITY

Local farmers receive ongoing training, guidance, and fair partnership. As their skills grow so does the quality of the harvest. Their craftsmanship, combined with disciplined standards turns raw potential into high-grade organic produce.

3 SUSTAINABLE BY DESIGN

Organic farming isn't treated as a marketing label, but as the foundation of the entire system. No synthetic chemicals, no herbicides. Only practices that regenerate soil, support biodiversity, and protect the land for long-term production.

4 CONSISTENCY THROUGH A HARMONIZED SYSTEM

A structured, integrated process keeps quality stable across batches. From seed preparation to post-harvest handling, every step follows a clear workflow that reduces variability.

5 CERTIFIED AND MARKET-READY

Products are verified by key Indonesian certifications and safety standards, supported by a traceable process from field to packaging.

FREQUENTLY ASKED QUESTIONS

What products are available today?

We currently offer organic white rice, brown rice, and fresh mushrooms. Additional organic vegetable and inputs like organic fertilizer are in development.

Do you supply nationwide?

Yes for dry products. Fresh products currently serve local areas, with wider cold-chain distribution planned.

Can you meet Horeca or distributor-level volume?

We support small to medium-scale orders today, with scalable capacity built into our farming expansion roadmap.

Are the products certified?

Yes, BPOM and SBC certifications are in place, with additional compliance and testing underway.

Do you offer bulk supply or custom packaging?

Yes, depending on product type and order volume. We can discuss the requirements. Contact us for any assistance.

How do we start a partnership?

Contact us via the form or WhatsApp. Our team will follow up within one business day.

OUR PARTNERS

From local culinary businesses to regional distributors, GENAH is proud to support partners who share our commitment to clean, sustainable, and high-quality organic products.

Congress & Seminar On-Site Events

Industry:
Event Organizer

Description:
Pitch deck presentation mockup
for Congress & Seminar On-Site
Events plan and preparation.

In order to plan for
the **engagement**
types and content,
we have mapped
out the typical
interaction
mechanisms

At the same time,
we have reviewed
the typical
facilities utilized
for these types of
events and sized
the space

**Key assumption:
28,000 participants
over 2 days**

Secondary Pavilions

Total: 6
Capacity: 1,000 - 2,000 people

Should accommodate smaller, topic-specific gatherings. Equipped with AV technology and flexible seating arrangements such as classroom, U-shape, or boardroom styles, depending on the session format

Networking zones

Total: 3
Capacity: 200 - 300 people

These should be scattered around the venue, with enough space to avoid overcrowding. Consider multiple smaller zones strategically positioned near food and beverage services to enhance networking opportunities. Each should hold 200-300 people at a time in a relaxed setting

Media and press area

Total: 1
Capacity: 50 - 100 people

Include space for interviews, sufficient electrical outlets, high-speed internet, and possibly a small auditorium or meeting spaces for press conferences

Main Pavilions

Total: 1
Capacity: 10,000-15,000 people

Large enough to comfortably seat a large portion of participants with ample space for stages, AV setups, and comfortable seating. Use theater-style or auditorium seating for optimal space utilization. This pavilion will host the major sessions and can be reused for different keynote sessions across the two days

Workshop/Interactive zones

Total: 4
Capacity: 500 - 1,000 people

Settings should facilitate interactivity, perhaps with round tables for brainstorming sessions, workshops, and hands-on activities

Exhibition areas

Total: 1
Capacity: 5,000 - 7,500 people

Space should be divided into booths or stalls, each tailored to the exhibitor's needs and ample aisle space to prevent congestion

VIP and Special Guest Lounges

Total: 2
Capacity: 50 - 100 VIP's

Comfortable seating, private restrooms, catering services, and space for private meetings or relaxation

...resulting in a potential
layout as follows

**"Achieving Security
and Cooperation in a
Fractured World"**

Speakers (1/4):

Malala Yousafzai
Nobel Peace Prize Laureate,
advocate for girls' education
and women's equality

Ban Ki-moon
Former Secretary-General of
the United Nations, who
worked extensively on global
peacekeeping

Leymah Gbowee
Nobel Laureate, Liberian peace
activist known for leading a
women's peace movement
that helped end the Second
Liberian Civil War

Juan Manuel Santos
Nobel Peace Prize-winning
former President of Colombia
who negotiated a peace
